HOW TO CALCULATE YOUR QUAY FRONTAGE?

The diagram opposite shows what is known as a “quay frontage”.

Here’s how to calculate it:

- 1/ Take the total beam (width) of your boat(s).
- 2/ Add 30 to 50 cm/boat for fenders + 2.50 m per pontoon (if applicable).

Our sales team is available to help you calculate your required frontage, which may vary depending on the location allocated to you.

² The surface area corresponds to the overall length x width in metres, with a minimum chargeable surface area of 30 sqm. Boats less than 10 metres in length are not permitted to float in the Vieux Port. New motorboats less than 8 metres in length are not permitted to float in Port Canto.

³ Until 30 April 2026, you have the option to cancel certain boats in the water ordered at no cost, up to a limit of 20% of the number of boats in the water ordered. Please refer to Article 4 of the appendix that will be sent to you with your quotation for details on how to exercise this cancellation option, including the number of boats afloat that can be cancelled at no cost.

⁴ Pontoons and gangways required for your floating configuration will be invoiced according to the size of these pontoons, including gangways, at the current rates. A quote will be sent to you at a later date.

 For your boats in the water and on land, it is mandatory to complete the “technical information” form.

CREW WRISTBANDS: For safety reasons, every person staying on a boat on display MUST wear a Cannes Yachting Festival crew wristband on their wrist, even outside the show’s opening hours. This non-transferable wristband allows 24-hour access to the show.
Visit your Exhibitor Area from April 2026 onwards to order the crew wristbands you need and fill in the required information.
